

KONICA MINOLTA

Press release

Konica Minolta to show new Colibri® Software platform for the global supply chain at MECS 2014

Nieuwegein, March 4th 2014

Konica Minolta will exhibit their full line of advanced colour management solutions, including the latest version of the software platform Colibri® capable to cover all tasks from product design, definition of standards, colour matching, quality control to global sourcing. This unique modular and fully scalable software platform concept allows customers to configure the software based on their requirements including the suitable enterprise architecture from single workplace to global cloud solution.

The unrivaled mathematics of Colibri® allows accurate and simultaneous matching of the colour and the opacity, from full opaque to fully transparent. This results in improved efficiency, productivity and cost reduction for recipe calculation of Coatings and Plastics.

The modern architecture of Colibri® reflects in the comprehensive GUI and SQL database structure all based on leading Microsoft® technology. Customizable templates allow perfect adaptation to the user workflow and emphasize the ease of use.

Visitors will also find the full line of Konica Minolta's portable and bench-top spectrophotometers connected to the Colibri® software. Konica Minolta spectrophotometers have the reputation to provide industry best levels of inter-instrument and inter-model agreement out of the factory a major prerequisite for global enterprises depending on the exchange of Digital Color Data.

KONICA MINOLTA

About Konica Minolta Sensing Europe B.V.:

Konica Minolta Sensing Europe B.V., part of Konica Minolta Inc. Japan, Optical Business, is a leading provider of measurement solutions for applications in the fields of Colour & Appearance and Light Measurements. Konica Minolta Sensing Europe serves the industry in the EMEA region with Branches and Distributors in more than 30 countries. Derived from our state-of-the-art optical and image processing technologies, measuring solutions from Konica Minolta Sensing help improve quality control and support R&D in a wide variety of industries.

Our colour management solutions are essential to control and monitor quality in many areas of manufacturing, such as automotive, coatings, plastic, construction materials, food, chemicals and pharmaceuticals. In the innovative area of Light & Display technology, Konica Minolta Colour Analysers enjoy an „industry standard,„ position. Konica Minolta Sensing will continue to innovate, utilising the latest high-accuracy sensing technology providing solutions that meet the ever-changing needs in diverse fields.
